

SULEMAN JAVED MULANI

DATA ANALYST • PYTHON • SQL • MACHINE LEARNING

Pune, India | +91 91560 95587 | sulemanjm1604@gmail.com | linkedin.com/in/suleman-mulani1608

PROFESSIONAL SUMMARY

Data Analyst (entry-level) and MCA student (CGPA 9.32, graduating 2027) skilled in Python, SQL, Pandas, exploratory data analysis, machine learning and data visualization. Built three end-to-end data projects covering property price prediction, customer churn analysis and real-time traffic optimization, and completed a Python/ML internship working on real datasets. Seeking an entry-level Data Analyst role to turn data into actionable business insights.

Core Competencies: Data Analysis | Data Cleaning | Exploratory Data Analysis | SQL Querying | Predictive Modeling | Data Visualization | Dashboard Development | Statistical Analysis | Machine Learning | Business Insights

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, Supabase

Data Analysis & ML: Pandas, NumPy, Scikit-learn, Machine Learning, Regression, Classification, Exploratory Data Analysis (EDA), Data Cleaning, Customer Segmentation, OpenCV

Data Visualization & BI: Power BI, Plotly, Matplotlib, Seaborn, Streamlit, Dashboards

AI Tools: Prompt Engineering, AI-assisted coding (Qoder, Trae)

Other: Computer Hardware, Troubleshooting, Windows Installation & Support

EXPERIENCE

Python / PyML Intern

21 Feb 2026 – 30 Apr 2026

GTT Data Solution Pvt. Ltd.

- Performed data cleaning, analysis and model building on real datasets using Python, Pandas, NumPy and Scikit-learn.
- Presented analysis findings and model results to the team, translating technical output into clear insights.

Data Science Intern

20 Jul 2025 – 20 Jan 2026

The Skybrisk

- Completed a 6-month Data Science Internship covering data analysis, model building and applied machine learning workflows.
- Worked on real-world data science tasks, strengthening skills in Python, data cleaning and predictive modeling.

PROJECTS

Real Estate Valuation & Investment System

Python, Pandas, Scikit-learn, MySQL, Streamlit, Plotly

- Built machine learning regression models to predict property prices from location, area, amenities and market trends.
- Developed ROI estimation, price trend analysis and neighbourhood insights with interactive Plotly visualizations in a Streamlit app.

Customer Churn Prediction & Retention Analysis

Python, SQL, Scikit-learn, Streamlit, Matplotlib

- Performed data cleaning, EDA, customer segmentation and churn trend analysis using Python and SQL.
- Built a classification model using tenure, contract type, monthly charges, services and payment method to predict churn.
- Delivered a Streamlit dashboard showing churn rates, key churn drivers and retention insights.

Dynamic Smart Traffic System

Python, OpenCV, NumPy, Pandas

- Trained a custom model to detect and count vehicles in real time from live video feeds.
- Analyzed real-time traffic density and dynamically adjusted signal timings across all four junction approaches (North, South, East, West) to reduce congestion.

Employee Attrition Prediction using Tabular XAI (Healthcare)

Python, Pandas, Scikit-learn, SHAP

- Built a classification model to predict employee attrition in a healthcare workforce dataset using tenure, workload, satisfaction and demographic features.
- Applied Explainable AI (SHAP) on tabular data to interpret model predictions and identify key drivers of attrition for HR decision-making.
- Generated feature-level explanation plots to present attrition risk scores and key drivers for individual employees.

EDUCATION

Master of Computer Applications (MCA) – Trinity Academy of Engineering

2025 – 2027 (Expected)

CGPA: 9.32

Bachelor of Computer Applications (BCA) – Abeda Inamdar Senior College

2022 – 2025

CGPA: 8.85

CERTIFICATIONS

- Data Science Internship – The Skybrisk (Jul 2025 – Jan 2026)
- Python / Data Analyst – GTT Data Solution Pvt. Ltd. (Feb 2026 – Apr 2026)
- Bug2Build – Gravity Quadrant, Trinity Academy of Engineering (March 2026)

Languages: English, Hindi, Marathi
